

**AIR-TEC Africa** sells and leases aircrafts, specializing in the LET L410/420 range. Our clients include mainly regional airlines, or clients requiring smaller aircrafts.

The company is based in Port-Louis, Mauritius and also has branches in France, the Czech Republic and South Africa. **AIR-TEC Africa** offers a comprehensive service to its clients starting with economic studies to establish current needs and predict future growth. **AIR-TEC** can adapt and modify the aircraft according to the client's specifications.

**AIR-TEC** currently has a staff of competent pilots that understand the importance of customer service and know how to perform and excel above the standard. The flight crews can be loaned to the client for specified periods, while training the client's own pilots in the specific aircraft concerned. IOAFC also offers training of technicians to service and maintenance. This means that clients are able to pilot and maintain their own aircraft, in the most cost-effective way.

**AIR-TEC's** goal is to provide its clients with first class services to ensure their operation success. Our wide array of fleet diversification (from the LET 410/420, Beech 1900D, Learjet 45 etc...) and custom made leases allow us to provide to various aircraft operators or clients a solution that works best in insuring their success. This formula is what sets us apart when it comes to the world of aviation leasing.

**AIR-TEC Africa** specializes in regional turbo-prop ACMI services (Aircraft, Crew, Maintenance and Insurance) and unlike other lessors, we provide full operational support and assistance in order to help and create a capable, organized and successful operation. Through the ACMI leasing services, **AIR-TEC** will provide 'ready-to-use' aircrafts for our client need and success. We will provide the Aircraft, all required crew and will cover all maintenance related expenses.

We also have a team of qualified and experienced engineers dedicated to quality and excellence, thus keeping our fleet keeping our fleet in excellent condition in order to provide our client with the most reliable and well maintain aircrafts available throughout the market.

Within the aviation industry, buying an aircraft is always a critical and crucial factor in any operation. With over 15 years of industry experience within the regional turbo prop sector, **AIR-TEC** is able to offer a wide range of aviation services. Our expertise and hands-on knowledge of virtually every aspect involved within the aviation industry allows us to provide customized and tailor made solutions to custom fit the each individual clients. Our range of services includes but not restricted to:

1. Aircraft Management & Accounting
2. Aircraft acquisition and financing (LET 410/420)
3. Aircraft Maintenance reserve management
4. Operation Planning and support
